

DIPAL KHARVA

Senior Full Stack Engineer | Node.js • React • TypeScript

+91 97732 83074 | dipalkharva1@gmail.com | linkedin.com/in/dipalkharva

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Engineer with 7+ years of experience building highly scalable, secure, and automated web applications. Deep expertise in Node.js, React, and TypeScript, with a strong track record of designing robust server-side services, RESTful and WebSocket APIs, PostgreSQL-backed systems, and event-driven pipelines using RabbitMQ and Redis. Experienced in leading Agile teams, mentoring engineers, championing CI/CD best practices, and delivering enterprise-grade ad-tech and SaaS platforms for 10K+ users. Passionate about performance optimization, clean architecture, and scalable automation solutions.

TECHNICAL SKILLS

Node.js & Backend	Node.js (7+ yrs), NestJS, REST APIs, WebSocket, CORS, HTTP, Microservices, RabbitMQ, Redis
Frontend Engineering	React.js, Hooks, HOC, Render Props, Next.js, Angular, Responsive UI, Atomic Design, Shared UX Libraries
TypeScript & JavaScript	TypeScript, Advanced JS, Clean/Secure Code, Module-based Architecture
Databases	PostgreSQL, MySQL, MongoDB, ORM, Query Optimization, Data Modeling
DevOps & CI/CD	Docker, Kubernetes, CI/CD Pipelines, AWS ECS, Git-flow, GitHub, Bitbucket
Security	Cybersecurity principles, Auth/AuthZ, RBAC, Data Encryption, Secure API Design
State Management	Redux, Context API, NgRx – selecting optimal system per use case
Agile & Leadership	Agile/Scrum, Sprint Planning, Code Reviews, Mentoring, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Module Lead | PMC India – Vadodara, India

May 2025 – Present

- Google Ads Automation & Campaign Services:** Spearheaded end-to-end migration of legacy Software AG webMethods integrations to containerized Node.js microservices on AWS ECS, enabling scalable campaign automation pipelines for 10K+ users.
- Server-Side Architecture:** Architected event-driven, highly available Node.js/NestJS services following REST and WebSocket standards, with RabbitMQ for async messaging and Redis for caching — ensuring 99.9% uptime.
- Database Design & ORM:** Designed and optimized PostgreSQL schemas using ORM tooling, improving query performance and supporting complex campaign data models.
- Frontend React Development:** Built reusable React component libraries and core UI workflows aligned with Atomic Design principles; optimized performance across devices and browsers.
- CI/CD & DevOps:** Established automated CI/CD pipelines using Docker, Kubernetes, and AWS ECS for production-grade build, test, and deployment workflows.
- Security Leadership:** Designed and enforced cybersecurity principles including RBAC, data encryption, and secure API standards across all services.
- Engineering Leadership:** Mentored engineers, led peer code reviews, drove Agile sprint planning, and championed software engineering best practices across the team.

Team Lead & Full Stack Developer | [Skill Quotient \(Remote\)](#) – Kuala Lumpur, Malaysia *Nov 2021 – Mar 2025*

- **Scalable SaaS Platforms:** Led design and delivery of enterprise-grade SaaS applications (Node.js, NestJS, React, TypeScript) serving 10K+ concurrent users with high availability and performance.
- **API & Microservices Architecture:** Designed and maintained RESTful APIs and microservices; deep expertise in CORS, HTTP, WebSocket, and integration with third-party platforms.
- **Frontend Engineering:** Authored advanced React components using Hooks, HOC, and Render Props; built shared UX libraries following Atomic Design; translated wireframes into high-performance, cross-browser interfaces.
- **State Management:** Implemented and evaluated multiple state management systems (Redux, Context API) to select optimal solutions per feature use case.
- **PostgreSQL & Database ORM:** Modeled and optimized complex relational databases; enforced query performance and schema best practices.
- **Code Reviews & Mentorship:** Reviewed code systematically, provided structured feedback, and mentored junior/mid-level developers to grow team capabilities.

Key Projects:

- **SQe-IMS (Secure Invoice Management System)** – Node.js, NestJS, React, TypeScript, PostgreSQL. Built a secure, scalable invoice automation platform with advanced role-based access control.
- **Cerebro / Wizard (Enterprise Analytics Portal)** – Integrated 50+ enterprise data sources; engineered self-service analytics enabling faster data-driven decisions.
- **Repotomatic (Reporting Platform)** – Delivered internal reporting automation generating 10,000+ documents annually.

Team Lead & Full Stack Developer | [AKCESS \(Remote\)](#) – London, England *Mar 2020 – Nov 2021*

- Built digital identity, onboarding, and verification platforms (MEAN/MERN stack) with 99.9% accuracy OCR and AI face matching, accelerating customer onboarding by 50%.
- Implemented secure eKYC, digital ID, and e-signature systems with 100% encrypted document storage and secure data sharing APIs.
- Delivered multi-domain portals (banking, education, SME) cutting administrative overhead by 30–40% through automation and real-time notifications.
- Enforced API security standards, secure authentication, and performance optimization across all services.

Full Stack Developer | [Rigel Networks](#) – Vadodara, India *Sep 2019 – Apr 2020*

- Built scalable e-commerce and ERP applications (MERN/MEAN stacks) reducing operational complexity by 50% through automation and centralized workflows.
- Developed and documented RESTful APIs; performed performance tuning and code reviews to maintain clean, reliable codebases.

Full Stack Developer | [Adrixus Tech Studio](#) – Vadodara, India *May 2019 – Sep 2019*

- Developed real-time GPS vehicle tracking system with 99.9% location accuracy, geofencing alerts, and analytics.

Junior Node.js Developer | [Vistaure](#) – Vadodara, India *May 2017 – May 2019*

- Designed RESTful APIs and optimized SQL/NoSQL databases, improving system performance by 30%; implemented security best practices ensuring 99.9% uptime.
- Built ERP, visa processing, expense management, and auction platforms delivering measurable efficiency gains across all solutions.

EDUCATION

Master of Computer Applications (MCA) – The Maharaja Sayajirao University of Baroda | 2015–2018

Bachelor of Computer Applications (BCA) – The Maharaja Sayajirao University of Baroda | 2011–2015
